Cypress Grove Montessori Academy's

2nd Annual Equinox Extravaganza

Let the Adventure Begin

September 23, 2023 at 6:00pm

2461 North King Avenue Lutcher, LA

Queen Mila Aucoin
King Eli Detillier

Queen Venus: In Roman mythology, Venus was the goddess of love and beauty.

King Mercury: The Greek god Hermes (the Roman Mercury) was the god of translators and interpreters. He was most clever of the Olympian gods, and served as messenger for all other gods.

1st Maid Haven Nassar
1st Duke James Mendoza

There are a few different definitions of constellations, but many people think of constellations as a group of stars. Often, it is a group of stars that looks like a particular shape in the sky and has been given a name. These stars are far away from Earth. They are not connected to each other at all.

2nd Maid Emma Chabaud
2nd Duke Carson Boe

Solar Eclipse will occur on October 14. The new moon will pass in front of the sun. Solar annular eclipses happen when the sun, moon, and Earth align. The moon's smaller size cause a ring-like effect as it partially covers the sun but is too far away to completely cover up the sun, making it an annular eclipse rather than a total eclipse.

3rd Maid Jolie Martin
3rd Duke Hudson Hymel

Vernal Equinox signifies the change from winter to spring for the northern hemisphere.

4th Maid Pippa Morvant
4th Duke Harrison Copponex

Hybrid Eclipses are considered extremely rare due to the frequency in which they occur, which is only a few times every century. For example, the next alignment is expected in 2031, the last predicted occurrence for 133 years!

5th Maid Nola Nosacka
5th Lincoln Cruise

There are three types of lunar eclipse: total, partial, and penumbral. At least two partial lunar eclipses happen every year, but total lunar eclipses are rare.

6th Maid Parker Byrd
6th Duke Preston Gravois

The Winter Solstice results in the shortest day of the year, meaning it has the longest period of darkness.

7th Maid Lila Cortez
7th Duke Braylen Errington

The Summer Solstice results in the longest day of the year (sometimes called midsummer), meaning it has the most time of daylight.

8th Maid Addie Petrey
8th Duke Branson Errington

The Autumnal Equinox signifies the change from summer to fall for the northern hemisphere. The sun is exactly above the equator. The sun crosses the celestial equator going south.

2022 Equinox Extravaganza

Queen Kendall Deslatte
King Kash Deslatte

Let the Adventure Begin

Opening: Mrs. Becky Louque, Principal

Master of Ceremonies: Mr. Chris Kimball
Mistress of Ceremonies: Mrs. Ashley Boyd
